

PASSION, KNOWLEDGE, EXPERIENCE

Over thirty years of experience in the fishing industry gives us a broad perspective. We closely follow the fishing market in Poland, across Europe and beyond. For decades, we have been talking to and carefully observing fish from all around the globe. We actively fish from the shore, from boats, with floats, with spinning rods, with bottom fishing methods... we really can sum it up with our motto: Total Fishing! We are completely obsessed with fishing and everything related to it. Constantly in pursuit, constantly on the move, constantly immersed in our passion, which has become so much more than just a big part of our lives - fishing is our whole life.

So, what can we say about these years? Has anything changed?

Everything has changed. We fish more consciously, our equipment is more carefully designed for the purpose, stronger, and more sensitive. We use advanced technologies that we could only dream of just a few years ago. Fishing electronics opens our eyes and allows us to read the underwater world. Who would have thought not long ago that a 20 cm Saira would be ideal even for small zander? There are so many more examples like that.

We see changes in the mentality of anglers, and it immensely pleases us. We believe that someday our fishing grounds will be full of fish again, and words like moderation, awareness, knowledge, and politeness will not only evoke an ironic smile. Changes are happening right in front of our eyes, mainly among the youngest generation of anglers. We support many fishing schools for children and youth, as well as picnics and fishing camps. These activities are often not visible, no one promotes them specifically - they just happen... Our mission is the development of fishing, and it is the youngest generation that can change the most.

There are also things that have not changed. And that's great.

For many years, we have been driven by passion. Passion for finding new solutions, for fishing more consciously and effectively. It propels us in our daily actions, and despite many obstacles and disappointments, we do not give up and we do move forward. Every day, we reach to a higher level, every day we become better, and every day we strive to make the most of all the opportunities we are given. It is this passion that drives us in our work, in fishing, and in life. In a life that is filled with travels to new places, being in nature, adventures, and friends. We must tell you: it's a beautiful life!

Thank You, MFT
